This link from my friend Tony. Middletown School District in the state of Rhode Island have announced a pilot programme to monitor the movements of students through the use of RFID . The programme is being run by MAP Information Technology Corporation, and will involve eighty students at the Aquidneck School. Students will have a tiny RFID chip implanted in their school bag, which will pass through a scanner as they board the school bus. The buses will be equipped with GPS, and can transmit their exact location to an internet site, along with a record of which children are on the bus. Parents and teachers will be able to log onto the website to access this information. While the aim of the programme is to improve child protection as they travel to and from school, some have expressed concern that the information could actually be exploited by paedophiles seeking to target children.

Quote: *"The American Civil Liberties Union (ACLU) has criticized the plan as an invasion of children's privacy and a potential risk to their safety. "There's absolutely no need to be tagging children," said Stephen Brown, executive director of the ACLU's Rhode Island chapter. According to Brown, the school district should already know where its students are. "[This program is] a solution in search of a problem," Brown said. The school district says that its current plan is no different than other programs already in place for parents to monitor their children's school experience. For example, parents can already check on their children's attendance records and what they have for lunch, said district Superintendent Rosemary Kraeger.*

As we have seen recently with the Bilderberg gathering in Washington D.C., RFID is fast becoming a part of everyday living. We now have the technology to fulfill the prophecies concerning the Mark of Beast. It's not a question of if but when these things begin to come to pass. The fact that efforts are already being made to identify certain people groups, whether it's soldiers , prisoners , Alzheimer patients or school children, shows us just how far we have come. As we saw with the Asian Tsunami in December 2004, it would not take a great deal of persuasion to convince people to have a chip implanted in their right hand or forehead, in the event of some global catastrophe or crisis. Just one example. Imagine that food prices continue to spiral, as the Bible predicts they will (Revelation 6:6). The government starts rationing food, and in order to receive your daily allowance, you have to prove your identity. So they suggest everyone has a chip inserted in their right hand or forehead, so as to speed the process of identification and reduce fraud. Those that don't get the chip don't get the food. The Bible does say that no man should buy or sell save he have the Mark (Revelation 13:17). During this time there will be great disasters happening on earth, such as killer hail (Revelation 16:21), a meteor strike (Revelation 8:8), earthquakes (Revelation 16:18-19) and global war (Revelation 9:15-19). It will be a terrible time for those who dwell on earth. But mankind must reap what he has sown. The time of the end is drawing near. Jesus Christ is coming back. Are you ready to meet Him? Have your sins

been forgiven? Jesus Christ died for you. He bore God's punishment for your sins when He died upon the cross. All who believe on Him for salvation shall have everlasting life, and shall not come into judgement, but have passed from death unto life (John 5:24). Repent of your sins and believe on Jesus Christ for salvation today.
